

Which services does GFBio offer for research data management?

Short Answer

GFBio aims at supporting researchers to develop and implement effective data management strategies for findable, accessible, interoperable and reusable data ([FAIR data principles](#)).

Detailed Answer

We offer help in all steps of the data life cycle, from project proposal to long-term data archival, e.g. data management planning support, data curation, consulting and cost estimation, and training.

Our services are:

- [Helpdesk](#)
- [Data Submission](#)
- [Data Management Plan \(DMP\)](#)
- [Visualization, Analysis and Transformation System \(VAT\)](#)
- [Terminology Service \(TS\)](#)
- Contact via Email: info@gfbio.org

Please check the detailed description of our [service portfolio](#) or have a look at the short GFBio videoclip, describing our bee-loved core services.
