

What data types are suitable for submission?

Short Answer

GFBio welcomes all types of biodiversity data.

Detailed Answer

GFBio accepts all types of biological data, including occurrence, collection, ecological and molecular sequence data. This also covers environmental data, for example, sensor data, and other (experimental) analysis data. Additionally, taxonomic lists (e.g. red lists), related code, and multimedia files can be submitted.

For detailed information on major types of biological data defined by GFBio see https://gfbio.biowikifarm.net/wiki/Major_Types_of_Biological_Data .
