

Do I need an ORCID to submit data to GFBio?

Short Answer

No, but it is encouraged, as it will improve your research data.

Detailed Answer

No, you don't need an ORCID to submit your data to GFBio. But to use the [GFBio submission services](#) you need to log in first. This can be achieved by using your existing GFBio account or alternatively by using one of the listed third-party accounts, among them the option to login via ORCID. If you are not sure what ORCID means, look here: [What is an ORCID?](#)
